Community Groundwater Sanitary Survey Form

Date:	Date	e of last	survey:		
nspector(s):,		<u>,</u>			
<u> Jtility Information</u>					
PWSID:	_				
Utility name:	_ Contact pers	on:			
Mailing address:	Alternate co	ntact:			
	_ Telephone:_				
	Fax:				
	_ Other phone	: <u> </u>			
Service Connections					
Number of metered connections	_ Number of u	nmetere	d conne	ctions	
Population					
Operator Information					
Utility superintendent:					
Operators:	Class:(circle one)	1	II	III	IV
	Class:(circle one)	1	II	III	IV
	Class:(circle one)	1	II	III	IV
	Class:(circle one)	1	II	III	IV
Production Capacity					
Average daily production (MGD)	Max. daily p	oduction	n(MGD)_		
Ave. daily production - winter (MGD)	_ Ave. daily pr	oduction	- summ	er (MGD)
Does the system have an operational master meter?	□ yes	□ no)		
List all communities served by the water system:					
	n Summary				
Recommendations/requirements:					
3					

Source and Pumping Information

	Name of Source	Well ID [∄]	Yield (GPM)	Class ^{[라]라}	Nearby contaminants
Source 1		01			
Source 2		02			
Source 3		03			
Source 4		04			
Source 5		05			

Choose one of the following numeric codes for first digit of the well ID number.

1. Bedrock well

2. Surficial Well

3. Dug well/well po

- 3. Dug well/well points

- 4. Surface water
- 5. Purchased
- 6. Spring

₽₽Source classified as either active, backup or emergency

Wellhead Protection	'n
---------------------	----

Have plans been approved by geological services?	
List contaminants within a 300' radius of well:	

Raw Water Pumping

Pump number	1	2	3	4	5
Name of source					
Pump capacity (GPM)					
Horsepower rating					
Type of pump					
Manufacturer					
Last service date					
Condition of pump					

Finish Water Pumping

Pump number	1	2	3	4	5
Name of source					
Pump capacity (GPM)					
Horsepower rating					
Type of pump					
Manufacturer					
Last service date					
Condition of pump					

<u>Chemicals</u>	•					
Check all tha	at apply.					
□ Calcium hyp	ochlorite	☐ Sodium hydro	oxide	☐ Chlorine gas	☐ Sod	ium silicate
☐ Sodium hypo	ochlorite	☐ Zinc orthopho	osphate	☐ Sodium fluoride	☐ Silly	acid (fluoride)
□ Other						
Draw a schema	tic diagram fron	n source to distrib	oution and lab	pel chemical feed po	oints using numbe	ers below.
Chemical Inj	ection Meth	ods				
Pump #	1	2	3	4	5	6
Chemical						
Feed Type						
Make						
	ls injected at a	45° angle from the	e bottom of t	ne pipes? □ yes	□ no	
	-	_		ent system? □ yes	□ no	
	icals paced to fl		□ yes	□ no		
Are MSDS s	heets present fo	or each chemical?	?			

Is the spill containment system adequate?

Recommendations:

Are the chemical feed lines properly laid out?

On-site Storage				
Depth (ft):	Width (ft):	Length	n (ft):	
Volume per unit:		Numb	er of units installed:	
Is on-site storage prot	ected from chemical spills?			
Can on-site storage be	e bypassed for cleaning/mair	ntenance?		
Is storage overflow sc	reened properly?			
<u>Disinfection</u>				
Disinfectant used:			NSF approved?	
Monthly reports subn	nitted to DWP?		<u> </u>	
Chemical containmen	nt/safety equipment acceptab	ole?		
Is there a redundant	chemical feed pump on site?	·		
Does the system mor	nitor disinfectant with a contir	nuous, alarmed an	alyzer?	
Air Stripping				
Circle one of the follow	wing technologies: Lowry	Shallow Tray	Packed Tower MSDBA	Spray
Manufacturer:				
Is post aeration water	disinfected? (yes or no)			
Principle reason for ai	r stripping:			
lon exchange				
Purpose (softening, co	ontaminant removal, etc.)			
Contaminant(s) rer	moved:		<u> </u>	
Resin type:			<u> </u>	
Is raw/treated water ro	outinely monitored to determine	ne historic remova	l effeciency?	
How often is the unit s	serviced?			
Other Treatment				
Name:				
Purpose:				
Design parameter:				
Recommendations: _				

Distribution System

Fire Stations other areas	. ,	rvice agreemen	ts does the system h	ave?		
Plastic Cast iron Ductile iron Concrete Galvanized Steel Asbestos Cement Other Total length How often is the system flushed? spring fall both Are dead ends in the system are monitored for contamination? How many hydrants does the system own? How many people are employed for distribution system maintenance? Is the distribution maintenance crew appropriate for the size of the network? yes no Do distribution personnel have the proper equipment? yes no Are valves regularly exercised? yes no Does the system have a capital improvement plan? yes no Does the system have an active leak detection program? yes no Toss Connection Control Does the utility have a cross connection control program? (yes or no) Examine the written program Are approved backflow prevention devices installed at the following locations? Nursing Homes Hospitals Dentists' Offices Doctors' Offices Manufacturing Plants Auto Garages Water Treatment Plants Waste Treatment Plants Plant	Does the system have	e any pressure	boosting stations?			
Plastic Cast iron Ductile iron Concrete Galvanized Steel Asbestos Cement Other Total length How often is the system flushed? spring fall both Are dead ends in the system are monitored for contamination? How many hydrants does the system own? Are they all plugged? How many people are employed for distribution system maintenance? Is the distribution maintenance crew appropriate for the size of the network? yes no Do distribution personnel have the proper equipment? yes no Are valves regularly exercised? yes no Does the system have a capital improvement plan? yes no Are plastic lines covered with a tracer wire for easy location? yes no Does the system have an active leak detection program? yes no Poss Connection Control Does the utility have a cross connection control program? How many days of storage does the system have?	days
Storage tank notes:	

Sampling

Total Coliform Rule:

Can the tank be isolated from the system?

Are overflows/drains screened properly?

General tank condition: (good, bad, ugly)

How often are bacteriological samples taken?
How often should samples be taken , based on population data?
Does the D.W.P. have a sampling site plan on file?

Summary of PUC regulations, Chapter 62 re. Meter Testing Frequency Unless permitted otherwise a water company shall adopt the schedule shown below for routine testing of meters:"

Nominal Size of Meter	<u>Years</u>	Cubic Feet
5/8"	8	100,000
3/4"	8	150,000
1"	8	300,000
1 1/2"	6	-
2"	6	-
3"	4 Field	-
4"	2 Field	-
6"	1 Field	_

TC monitoring frequency for community water systems Population range # of samples per month 3 4 5
